

LEARNING

CYBERFIRST FUTURES VIRTUAL SUMMER COURSE

Course availability: all places are full, accepting reserve applications

This fully funded online course is aimed at attracting a diverse range of students, typically between 15 and 16-years-old, to explore advanced cyber security threats, then discover ways to prevent them. *It is open to students currently in Year 11 (England and Wales), S5 (Scotland) and Year 12 (Northern Ireland) in the 2021/22 academic year.* Spaces are limited, so sign up now to secure your spot.

CyberFirst Futures introduces you to more advanced practical features of cyber security. The course offers an insight into not just the method but the motivation behind cyber threats. You'll explore legislation, study typical behaviours of likely cyber attackers, and apply this new understanding of how to protect networks. You'll even learn to secure personal devices too – and how to protect networks and devices for future employers. These skills will help you and your friends and family stay safe online.

This event includes the following:

- Exploring the motivations for cyber attacks
- How to protect yourself from cyber threats
- Developing knowledge and understanding of networks
- How to protect a network from attack
- How to securely share resources with others
